The British Colonist - Dec 1, 1846 Browse this

The prevalence of stormy weather, with severe frost, accompanied with snow, interrup's materially the Lake navigation. The splendid boat the *City of Toronto*, left Kingston, on Wednesday night last. From the violence of the storm she was compelled to come to anchor under "Timber Island;" and although keeping her steam up, one cable parted and a fluke of the other anchor gave way. She then put about, and ran for Kingston, where she remained until Saturday evening,—when she started arriving in our bay on Sunday, at three, P.M. This, we believe, is her last trip.

The *America* came into port from Rochester, on Saturday morning. Captain Kerr informs us of several vessels on Lake Ontario, having suffered during the storm. He gives the following list; but fears he has not enumerated them all. The *America* has gone on another trip to Rochester; and we are told that she will probably make yet another, before going into winter quarters:—The schooner *Western* ashore at Ironliquet Bay; the *Illinois* at Braddock's Bay; the *Hamilton Merritt* and *Endeavour* on Braddock's Point; another schooner, name not known, off Grasse Point; the schr. *Missouri* on shore at Rush Creek; a brig and two schooners on shore between the Devil's Nose and Oak Orchard—one of them the *Poulett Thomson*; the name of the others unknown.

The British Colonist - Dec 1, 1846 Browse this r

During the violent storm last week, the wires of the magnetic telegraph were broken in several places, between Buffalo and New York, and between Buffalo and Rochester, and the communication was by this means stopped. The mails were also delayed for a few days. Snow fell in considerable quantities in the State of New-York, for several days in succession, -- producing good sleighing; and in Buffalo harbour, ice was formed of the thickness of an inch. Fears were entertained that the canal business would be stopped for the season; but a change of wind and a modification of the weather on Friday and Saturday, gave another aspect to affairs there, and business was accordingly resumed. The losses on the lakes have been considerable. We refer to our extracts.

QUERY No. 16.—*Climate of Canada West, and the Highest and Lowest Temperature, number of Wet and Snowy Days, &c., during the year?* ANSWER.—It is impossible better to answer this question, than by referring to the Government Meteorological observations made at Toronto, for the year 1840 a 1846, from which the following mean is taken;—

MEAN HEIGHT OF THERMOMETER.

Year.	Jan.	Feb.	March	April.	May.	June.	July.	Aug.	Sept.	Oct.	Nov.	Dec.	Yearly Mean.
1840	18°	29°	33°	43°	54°	60°.	66°	65°	54°	45°	36°	25°	44.1°
1841	25°	23°	28°	39°	51°	66°	65°	65°	61°	42°	35°	30°	44.3°
1842	28°	28°	36°	43°	50°	56°	66°	65°	56°	45°	33°	26°	44.3°
1843	29°	16°	22°	41°	59°	59°	66°	65°	59°	42°	33°	31°	42.8°
1844	21°	28°.	32°	48°	54°	60°	61°	66°.	58°	44°	35°	29°	44.7°.
1845	27°	25°	36°	42°	50°	61°	68°	67°	56°	46°	36°	22°	44.79°
1846	26°	21°	33°	41°	56°	61°	68°	68°	63°	45°	41°	28°	46.44°

WEATHER TABLE.

Showing the Amount of Rain, Snow, and Fair Weather, during each year, from 1840 to 1846, inclusive.

Year.	Number of Wet Days	Number of Snowy Days	Perfectly fair.	Toronto Bay frozen over.	Ice gone from Toronto Bay.
	Days.	Days.	Days.		
1840	97	56	213	6th December.	28th March.
1841	80	48	239	18th December.	12th April.
1842	89	55	221	Not noted.	17th March.
1843	83	72	209	13th December, but broke up again.	23rd April.
1844	106	41	219	18th December.	Not noted.
1845	97	47	221	3rd December.	Not noted.
1846	103	43	219	14th December.	8th April.

NOTE.—Any day on which rain falls, whether more or less, is noted as a wet day. The same observation applies to snow.

In the Home District, the plough is generally at work for a fortnight or three weeks before the ice leaves Toronto Bay; and on Lake Erie, the Spring opens a fortnight earlier than on Lake Ontario.

The ice on Toronto Bay is seldom more than eighteen inches thick; and the frost seldom penetrates the ground in this neighbourhood, even where most exposed, to a greater depth than two feet,—where the snow falls deep early in the season, the frost only penetrates a few inches.

Severe cold seldom lasts more than three days during the winter; the weather then moderates for a few days—again succeeded by a sharp frost. It is never so severe in Upper Canada as to put a stop to out-of door employment.
